

Dear Mr O'Farrell,

My friends and I are potential Liberal voters at the upcoming state elections. We would like to see you take a stance on Barangaroo.

Until the next election we would ask you to do everything you can to force the Government to disclose the facts about Barangaroo, to reconsider the move of the cruise ship terminal, to behave responsibly on the pollution issue, and to institute an independent consent authority.

When you are in Government we hope you will freeze the project and conduct a genuine, open process to implement something like the original award winning design rather than the Lend Lease plan. We would also like to see you replace the Part 3A planning process with something that prevents another Barangaroo ever happening again.

I hope with your help we can prevent a disaster at Barangaroo and create something much better for current and future generations.

Yours sincerely
